# POLYALUMINIUM CHLORIDE (PAC)

## Chemical overview

|              |                                                                                                                                     |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------|
| CAS #        | 1327-41-9                                                                                                                           |
| EINECS #     | 215-477-2                                                                                                                           |
| APPLICATIONS | <a href="#">Agriculture Intermediates</a> , <a href="#">Buffering Agents</a> , <a href="#">Water Treatment &amp; Pool Chemicals</a> |
| SYNOMYS      | PAC, Aluminium Chloride, Polyaluminum Chlorohydrate, Polyaluminum Hydroxychloride, Aluminum Chlorohydrate                           |
| FORMULA      | $\text{Al}_n(\text{OH})_m\text{Cl}_3n\text{-}m$                                                                                     |
| CATEGORIES   | Water Treatment & Pool Chemicals                                                                                                    |
